Professional Summary

Backend Engineer with **2+ years** of experience building scalable web applications using Django, Django REST Framework and PostgreSQL. Skilled in designing relational databases, implementing RESTful APIs, optimizing query performance, and deploying production systems using Docker and Azure. Strong experience in RBAC authentication, automated reporting systems, and performance tuning.

Professional Experiences

Backend Developer - AppGain.io

Jun 2024 – Present

- Developed Python web scraping pipelines extracting **8GB+ structured data** from 7 platforms into JSON and Google Sheets.
- Enhanced AppGain dashboard backend features, increasing user engagement by **25%**.
- Containerized backend services using Docker, reducing deployment inconsistencies by **40%**.
- Implemented GitLab CI/CD automation, decreasing release cycles by **30%**.
- Improved workflow efficiency using Jira, accelerating sprint delivery by **20%**.

Backend Developer - Minders

Nov 2023 – Jan 2025

- Led backend architecture using Django and DRF, serving internal and public-facing systems.
- Designed RESTful APIs and optimized database queries for performance and scalability.
- Improved website performance and traffic by **30%** through backend optimizations.

Education

Bachelor's degree in computer science – Cairo University

July 2024

- **Overall GPA:** 3.38 out of 4.0
- **Relevant Coursework:** Data Structures, Algorithm Design, Database Systems, Advanced Software Engineering, Web Technology.

Featured Projects

Military Officers Affairs System – Django, PostgreSQL, Bootstrap, Azure

- Designed and developed a centralized system managing **600+ military officers**, handling attendance, on-call schedules, vacations, and official missions.
- Automated daily reporting workflows, reducing manual administrative effort by **65%**.
- Built Arabic RTL PDF report engine generating **5+ official report types**, matching formal military documentation standards.
- Designed and optimized **15+ relational database models**, improving data integrity and scalability.
- Implemented secure authentication and RBAC to protect **1,000+ personnel records**.
- Improved query performance by **40%** through indexing and optimized ORM usage.
- Deployed and maintained PostgreSQL production environment with optimized indexing, ensuring high availability and performance stability.

Sa3teenGd | Studying Helper – Django, Django REST Framework (DRF), JWT, Postman, Azure

- Designed and implemented the backend for a Flutter-based application with features including to-do lists, task scheduling, file storage, and an audio player for **100+ users**.
- Developed group functionality with materials, posts, comments, replies and likes, **increasing user retention by 15%**.
- Deployed the application on Azure to ensure scalability and security.

Order Processing System Developer – Django, Django REST Framework (DRF), JWT, Postman, Docker

- Built an Order Processing System using Django Rest Framework to facilitate efficient order management.
- Integrated stock management and automated emails for order confirmations, **reducing errors by 20%**.
- Secured authentication via JWT tokens, maintaining a **0% security breach record**.

Student Affairs System - Html, CSS, JS, Python, Django framework

- Built a user authentication system and student record management that handles all data about users, **processing over 500** student records.
Enabled advanced filtering of student records, improving administrative efficiency **by 25%**.

SKILLS

- **Backend:** Django, Django REST Framework (DRF), Flask, Wagtail CMS
- **Database:** PostgreSQL, SQL Server, MongoDB
- **DevOps & Cloud:** Docker, Azure, GitLab CI/CD
- **Tools:** GitLab, Postman, Jira, Clickup
- **Programming Languages:** Python, Html, CSS JavaScript, Java, C++

Extracurricular Activities

Programing Member - ICPC Community - Cairo University

Oct 2022– Oct 2023

- Focused on enhancing skills in Data Structures and Algorithms to build efficient programs and solve complex problems.
- Improved algorithmic programming skills through participation in **Codeforces** contests, **solved 60+ problems**.

Human Resources Volunteer - Minders

Nov 2022 – Nov 2023

- Conducted **40+ interviews** and evaluated members for various committees, enhancing the recruitment process.
